

St. Mary's School
6th Grade Summer Math Expectations 2018

Happy Summer Middle School Parents!

Like summer reading, ongoing math practice increases as student's ability to retain concepts, enhance their performance, and prepare them for the next grade level. The Summer Math Skills Sharpener workbook also gives students a better idea of what concepts they are expected to understand coming into 7th grade. This assignment will be collected on the ***third day of school, August 9th*** and counted as the first math **Quiz Grade** of the 2018-2019 school year. Failure to submit this packet on time, with detailed work, will result in a grade of a **zero**.

The book is divided into sections. The purple pages are skills review, the white pages are the lessons, and the yellow pages are challenge questions. I have chosen and assigned specific lessons (listed on the back of this page) to reinforce specific math skills. The lessons should take about 20 minutes each. **ALL WORK MUST BE SHOWN**. There is room on each page to show work, but if additional paper is needed, please staple it to the lesson it matches.

All students are expected to complete this packet individually and to the best of their ability. This is not a group assignment. Students may **NOT** use a calculator until after the packet is completed to check student answers. You should ensure that your child does not procrastinate, but rather plans the gradual completion of it during the summer.

Please join me as we work together to ensure your child's mathematical success. Do not hesitate to email me if you have concerns about your child's progress regarding summer math.

In His peace,

Carrie Templeton
Middle School Math/Science
